

Covid-19 Warning and Safety Labels

Ensure a safe workplace with our Covid-19 Warning and Safety Labels

Use our Covid-19 label range to clearly communicate social distancing rules/correct behaviours during the current global pandemic.

Suitable for use on various substrates and in a wide range of industries/environments.

You can help stop the spread of the disease by reminding the workforce of the correct practises to perform in the workplace. This can help to reassure the employees upon their return to work; easing their fears and allowing them to focus solely on their work load.

We have the ability to print any size or design, so we can cater for any requirement that you may have for these types of applications. For example, social distancing can simply be communicated by using our '2 metre minimum distance' labels shown to the right.

We offer a range of standard sizes, but can produce your Label in any shape or size required without drastically increasing the price!

Our **peelable vinyl** leaves no residue on surfaces when removed and has a lifetime of 5 years. All print is UV and waterproof.

Our **non-slip floor label** is constructed from a Hi-Tack vinyl with a strong and permanent adhesive. The label process is finished with a non-slip durable lamination.

Peelable Vinyl

100mm Circle

10 x labels £4.00 per label

25 x labels £2.40 per label

50 x labels £1.50 per label

500 x labels £1.60 per label

Bespoke design and sizes

We have an extensive library of warning, safety and hazard labels to choose from but our in-house design team can also design a bespoke to meet your requirements.

What else can we produce?

Ultra-Durable Fascia/Equipment Labels – Available on mark resistant vinyl or Autotex polyester with a choice of 3M adhesives. A full-colour, under-surface print provides the ultimate label in terms of durability.

Equipment Tags - Ideal for internal or external usage such as equipment maintenance, calibration, parking, events, marine equipment, trailers, telecoms, safety checks, scaffolding and ladder use. These long-life, robust, equipment tags are used widely in locations where identification, warning or information is needed.

Cable Labels – Our extremely popular cable labels provide a durable method of tracking/identifying all sizes of cables. They can be printed full-colour, with bar Codes and QR codes as standard.

Warranty Labels/Tamper-Seals – Warranty labels are predominately manufactured from tamper evident 'VOID' polyester or 'Ultra Destruct' vinyl to provide a secure seal, which prevents tampering with a warranted product.

Calibration/Test Labels – We manufacture a wide range of electrical test labels and have experience in manufacturing PAT labels in quantities of one hundred, to one million. 'Mark & Seal' labels allow the user to add variable information at the time of application, and then seal with a durable lamination.

Product Labels - Product labels of all types to suit everything from bottles and jars to hi-tech equipment. Our self adhesive labels will enhance your product, making it stand out in a competitive market.
